🐙 GitHub

SUMMARY:

Full-Stack Developer skilled in React, Next.js, Express, and MongoDB with experience building scalable web applications. Experienced in secure authentication (JWT, bcrypt), **HMAC verification**, and **encryption/decryption for secure data handling**. Proficient in payment integrations (eSewa, Stripe) and real-time systems using Socket.IO.

EXPERIENCE:

Back End Developer

12/2024 – 02/2025

Disabled Women Empowerment Committee Website (DWEC): 🌐

Developed and integrated back-end functionalities to establish secure admin access, enabling comprehensive data management capabilities.

Frontend Developer

04/2025 – 03/2026

WOW Finstack Nepal

Pokhara, Nepal

Achieved successful frontend development for internet banking solutions through React.js. Delivered robust HMAC encryption and decryption functionalities to improve data security. Enhanced overall user engagement by implementing innovative features.

EDUCATION:

Bachelor in Computer Science and Information Technology (BSc.CSIT)

Prithvi Narayan Campus

Currently pursuing

TECHNICAL SKILLS:

Frontend

ReactJS, Nextjs, Typescript

Backend

Spring Boot, Express.js

Database

PostgreSQL, MongoDB

PROJECTS:

Social Media App: 🌐

Tech Stack: React Js, Express Js, MongoDB, Tailwind CSS, Cloudinary, JWT, Bcrypt

- Frontend development using React Js for interactive, intuitive and responsive interface.
- Backend implementation using Node.js and Express.js to handle API integration and database operations.
- Database implemented using MongoDB to store user's info along with posts, likes, comments etc.
- User authentication implemented using JWT and Bcrypt.

Eat More: 🌐

Tech Stack: React Js, Express Js, MongoDB, Tailwind CSS, JWT, Bcrypt, Context API, Socket-io, Crypto-JS

- Frontend development using React Js for seamless user experience.
- Backend implementation using Node.js and Express.js to handle API integration and database operations.
- Database implemented using MongoDB to store user's info along with product info, add to cart functionality etc.
- User authentication implemented using JWT and Bcrypt.
- Includes payment options such as eSewa Payment or Cash on Delivery.
- Uses socket-io for realtime communication between user and admin.
- Added Admin Panel to set status of ordered foods such as Pending, Preparing, Out for Delivery etc.
